Uncut Sheet

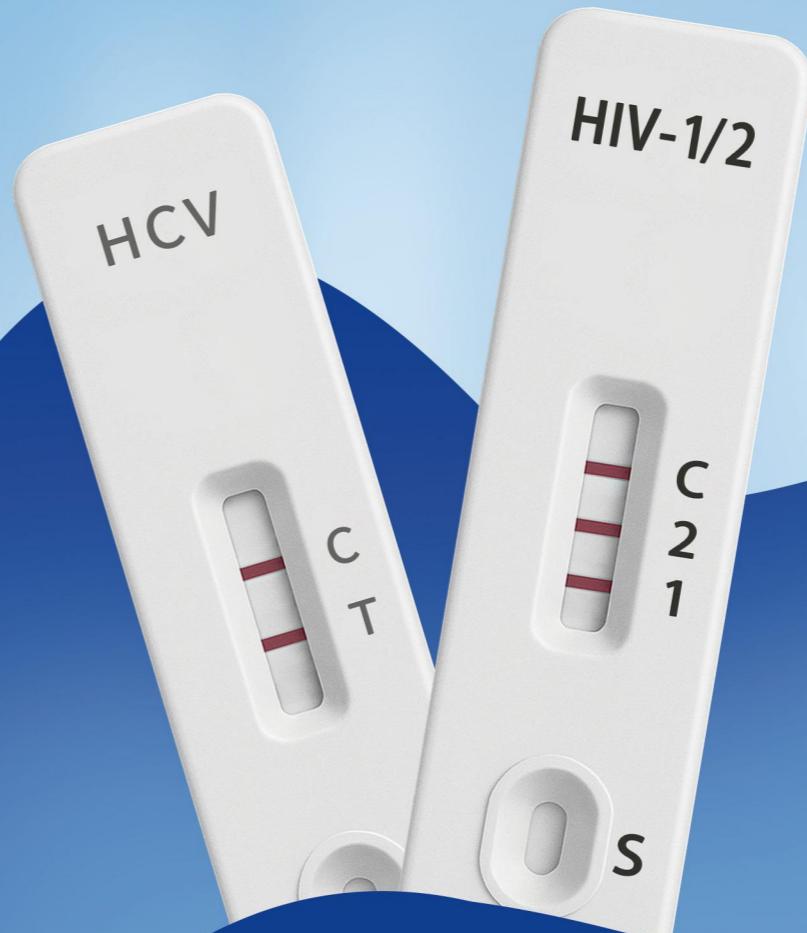

Rapid Test

Product Catalogue

IVD MANUFACTURER SINCE 2003

About NewScen

We are a leading manufacturer of uncut sheet rapid tests for a range of applications, including infectious diseases, tropical (mosquito transmitted) disease, drugs of abuse, tumor marker, hormone test, and more. With over 20 years of experience in the IVD industry, we have gained a reputation for accuracy, reliability, and ease of use.

At NewScen, we are committed to providing high-quality products that meet the evolving needs of the healthcare industry. Our research and development team is dedicated to developing new and improved products, and our manufacturing facilities are equipped with state-of-the-art equipment and staffed by experienced professionals.

Our Quality Policy

炮制虽繁 必不敢省人工

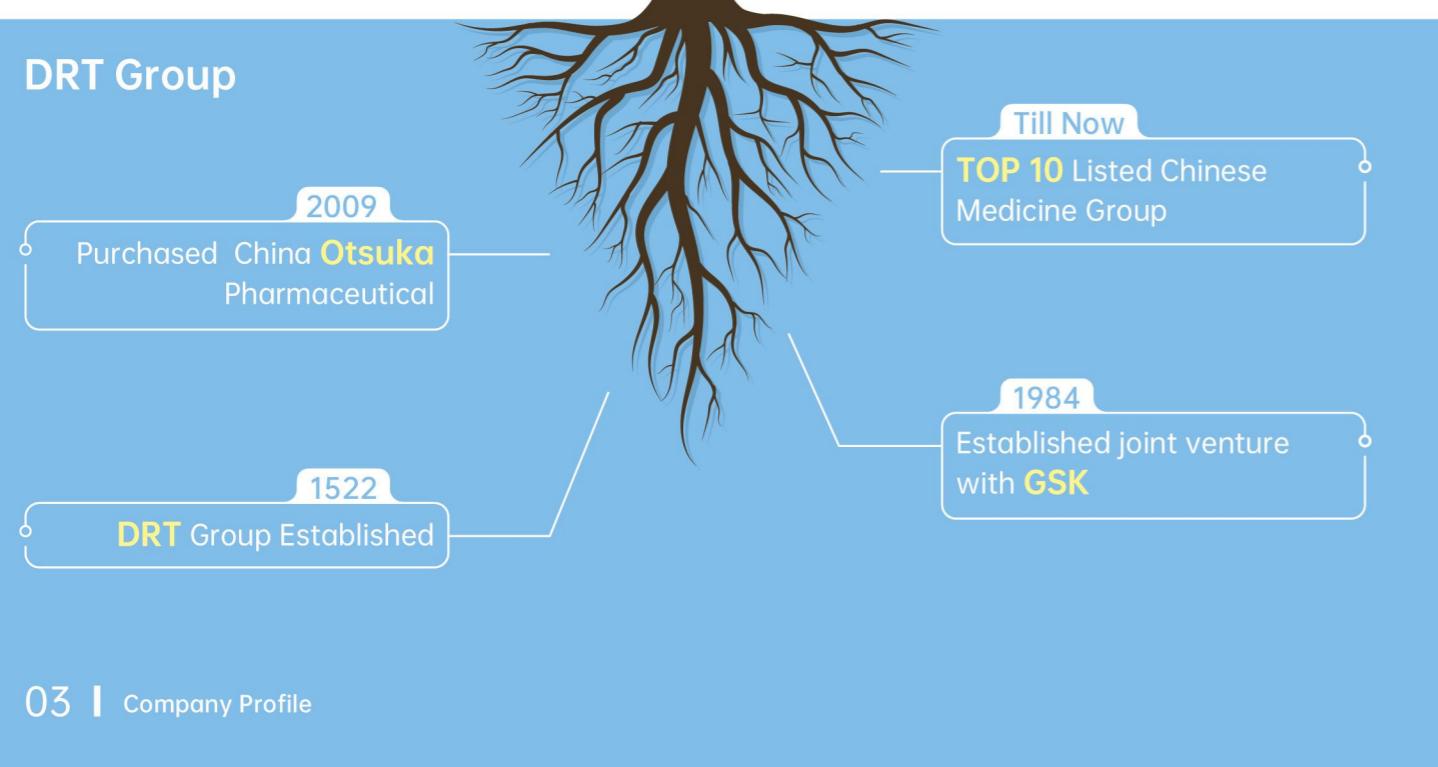

Despite complex processing, manual operations cannot be omitted

Over Five Centuries

品味虽贵 必不敢减物力

Even if the cost is high, no reduction of dosage or cutting corner allowed

DRT Group

Manufacturer:

NewScen Coast Bio-Pharmaceutical Co., Ltd.

Management System:

ISO 9001 : 2015 , ISO 13485 : 2016

Detection Type Method:

Colloidal Gold

Categories:

STD, Hormone, Iron Deficiency, Tropical Disease, DOA, Tumor Marker, Respiratory Disease, Metabolism, Cardiac Marker, Inflammatory Marker, Renal Injury

Formats:

Cassette, Strip, Midstream, Uncut Sheet For Rapid Diagnostic Test Kits

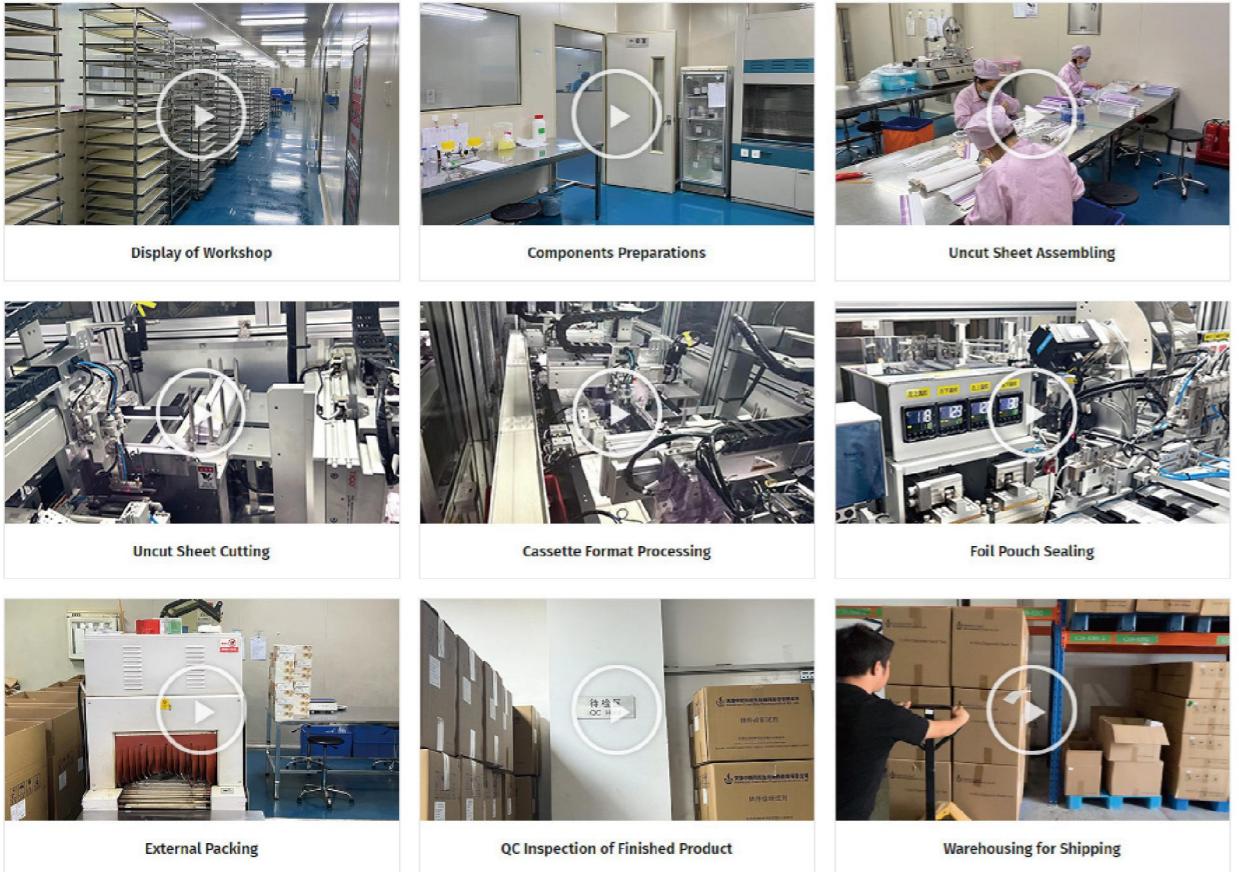

Versions:

Professional, Self-Testing, OEM Options

Market:

100+ Countries and Regions Globally

HIV (1+2) Antibody Rapid Test

Performance Advantage

IVDR Clinical Evaluation Result

Sen : 100%
Spe : 99.82%

WHO Performance Evaluation Result

Sen : 100%
Spe : 100%

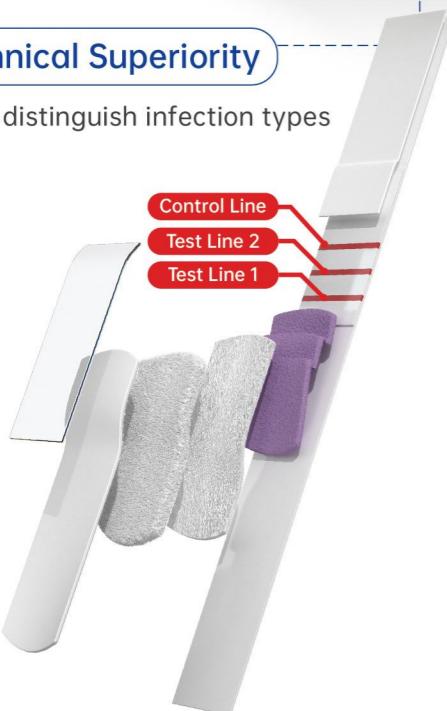

Certification Threshold

TÜV SÜD high-end certification, the highest quality endorsement

Technical Superiority

tri-lines, distinguish infection types

Window Period

7 days,
no competitor early than 7 days

Diversified Specification

single pack test kit available too

Market Advantage

won multiple CDC million level bids in China

Registration Support

professional registration team,
accelerate IVDR certification cycle

Test Procedure In 3 Simple Steps

Kit Components

Components	Quantity (pcs)				
	1 Test (HIV-1/2-29200111000)	2 Tests (HIV-1/2-29200201000)	5 Tests (HIV-1/2-29200501000)	25 Tests (HIV-1/2-29202511000)	40 Tests (HIV-1/2-29204017000)

Serum Ferritin Test Kit (SF)

Check Iron Deficiency in Minutes
Simple, Fast, Reliable!

Product Advantages

- *Identify anaemia symptoms earlier
- *Rapid 15-20 minute interpretation of results
- *Accurate and stable colloidal gold method
- *High sensitivity with clear color development
- *Home-use friendly – hospital-free, time-saving, and cost-effective

What are the effects of low ferritin?

Dizziness

Palpitations

Fatigue & weakness

Dry skin

Decreased immunity

Pale complexion

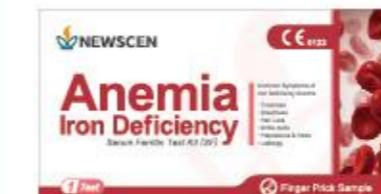

Loss of appetite

Rapid heartbeat

Components

1 Test / Kit

1 x Foil Pouch with Test Cassette and Desiccant

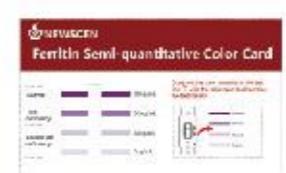

1 x Diluent Buffer

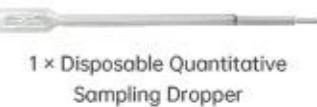

1 x Sterile Lancet

1 x Alcohol Pad

1 x Color Card

1 x Disposable Quantitative Sampling Dropper

1 x Instruction for Use

1 x Quick Manual (Optional)

Severe Iron Deficiency

One-Step Fecal Occult Blood (FOB) Diagnostic Kit

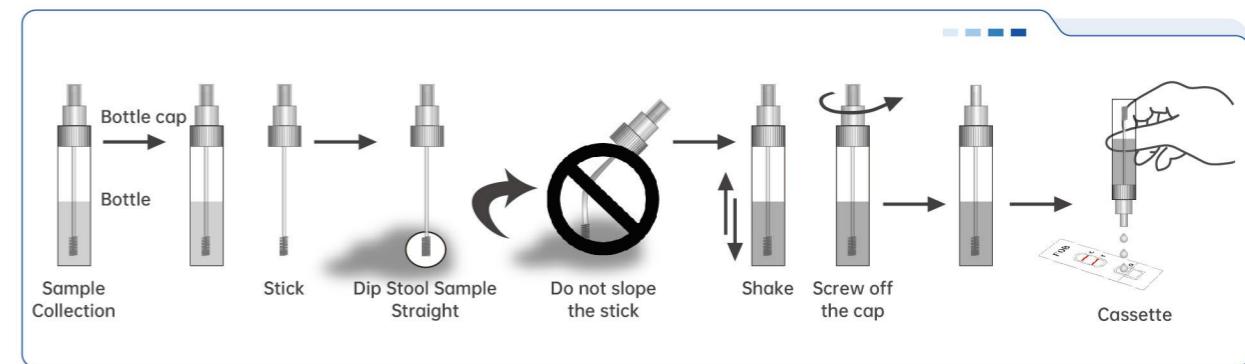

Product Advantages

- CE-marked self-testing kit for early detection of gastrointestinal (GI) bleeding
- Combines immune and chemical methods for enhanced accuracy and wider detection range
- Detects both upper and lower GI tract bleeding with high sensitivity and specificity
- Patented one-step design for easy and reliable combo test results
- Rapid results in 1-5 minutes, with no cross-reaction or Hook Effect interference
- No need for extra equipment; non-invasive, hygienic, and user-friendly
- Stable dry reagent, room temperature storage, perfect for **at-home use**

Common Symptom

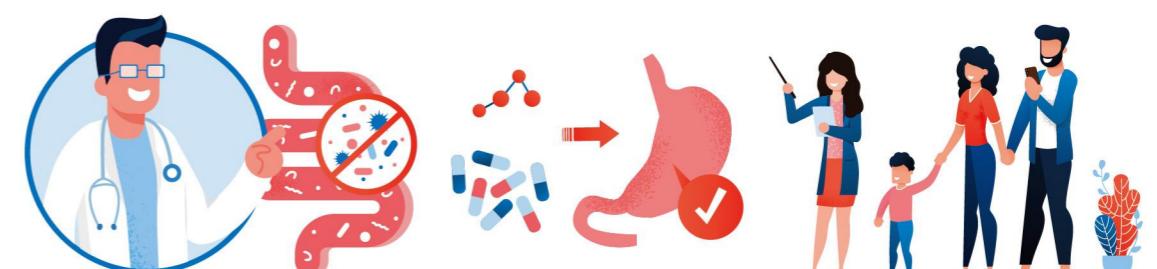

Assay Procedure

Result Interpretation

		Color card (Chemical method) Observe within 1 min		
		Positive	Negative	Invalid
Immune Method Test Result	Positive (+)			
	Negative (-)			
Chemical Method Test Result	Positive (+) 2µg/mL 20µg/mL 200µg/mL 2000µg/mL	Negative (-) 0µg/mL	Negative (-) 0µg/mL	Positive (+) ≤ 200 µg/ml 20µg/mL 200µg/mL ≥ 200 µg/ml 2000µg/mL
Final Interpretation	Positive (+)	Negative (-)	Positive (+)	Negative (-) Sample diluted 100 times & retest

Human Chorionic Gonadotropin (hCG) tests

Follicle Stimulating Hormone (FSH) tests (Menopause tests)

Product Advantages

- Clear and easy-to-read results – early pregnancy visible at a glance
- Detects pregnancy as early as 3-7 days after conception, including potential ectopic pregnancy
- High accuracy and sensitivity, detecting HCG levels as low as 25 mIU/mL
- Simple home self-test with fast results in just minutes
- Individually sealed, clean and hygienic packaging for safe and convenient use

Product Advantages

- Suitable for women of different ages to assess ovarian function and fertility status
- Fast and accurate results using colloidal gold technology
- Convenient home self-test – private, discreet, and user-friendly
- Can be tested anytime, regardless of menstrual cycle
- High sensitivity (as low as 25 mIU/mL), hospital-free and cost-effective

Luteinizing Hormone (LH) tests (Ovulation tests)

Product Advantages

- Cut-off value: 20 mIU/mL
- Accurate Timing: Detects the LH surge within hours of ovulation
- Test Principle: Peak-to-fade pattern confirms true ovulation
- Easy to Use: Simple one-step home self-test
- Smart Detection: Helps identify low peak ovulation and lock in the best time to conceive

H. Pylori (HP) Antigen Rapid test

Product Advantages

- Non-invasive detection of H. Pylori infection through stool samples
- Rapid results in 10-15 minutes for quick clinical decisions
- High accuracy using colloidal gold immunoassay technology
- Easy to operate with clear visual interpretation
- Suitable for home or clinical use – no need for endoscopy or biopsy

Significance of Combined Detection of HPAg and HPAb

Sample

Non-invasive, multi sample types for more reliable early diagnosis of H.Pylori. Convenient collection of stool specimen for HPAg and easy sampling of finger tip whole blood specimen for HPAb (S/P/WB sample applicable for professional use).

Operation

Easy operation for professional use in labs, hospitals and community health service centers (applicable for S/P/WB and stool sample) as well as the self sampling users at home for prognostic monitoring regularly while protecting personal privacy.

Interpretation

Combo detection of HPAg and HPAb offers 4 possible combinations of test results for prompt and clear interpretation of the H.Pylori infection and/or recovery status simultaneously within 10-15 minutes and provides reliable reference to timely and proper treatment.

H. Pylori (HP) Antibody Rapid test

Product Advantages

- Detects H. Pylori infection accurately through antibody screening
- Quick results within 10-15 minutes for early intervention
- Utilizes colloidal gold method – stable, reliable, and easy to interpret
- Non-invasive testing using a fingerstick whole blood sample
- Ideal for home or clinic use – simple, fast, and no lab required

Treponema Pallidum (TP) Antibody Rapid Test Kit

Product Advantages

- Cut-off value: 1NCU/mL. High sensitivity, specificity, accuracy and stability for clinical testing
- Patented technology, double antigen sandwich method for rapid screening of syphilis
- Reliable test result in consistent with that of the TPPA method detection kit
- Applicable for fingerstick whole blood, serum and plasma sample
- One-step method, easy operation, no equipments required
- Suitable for POCT testing, flexible application scenarios

Tropical Disease Rapid Test

MAR: Malaria (Pf/Pan)

Product Advantages

- Comprehensive and rapid detection of all 4 species (P.f, P.v, P.m, P.o)
- Differential diagnosis between P.f and other Plasmodium species
- Immediate and reliable double confirmation for P.f infection
- Room temperature storage (2-30°C), long shelf life (24 months)
- Applicable for both capillary and venous whole blood sample
- Easy and simple operation, suitable for point of care testing

DEN: Dengue (IgG/IgM), Dengue (NS1 Ag)

Product Advantages

IgG/IgM:

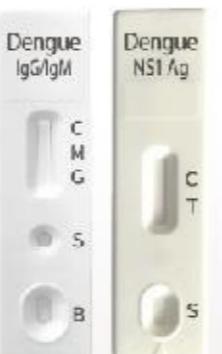

- Clear and fast differential diagnosis between primary and secondary infection
- Micro sampling (5µL), applicable for serum/plasma/whole blood sample

NS1 Ag:

- Double antibody sandwich method for early diagnosis of dengue infection
- Micro sampling (10µL), applicable for serum/plasma/whole blood sample

IgG/IgM & NS1 Ag:

- Easy operation, ideal for point of care testing in resource limited settings
- Test result can be shown within 1 minute for strong positive sample
- Room temperature storage (2-30°C), shelf life up to 24 months

ZIKA: Zika (IgG/IgM), Zika (NS1 Ag)

Product Advantages

- Differential diagnosis between primary and secondary infection
- Applicable for serum/plasma/whole blood sample
- High accuracy, clear visual interpretation
- Ideal for resource limited settings
- Room temperature storage

CHIK: Chikungunya (IgG/IgM)

Product Advantages

- Differential diagnosis between primary and secondary infection
- Applicable for serum/plasma/whole blood sample
- Convenient operation, suitable for POCT
- Room temperature storage

RDTs Series

Drugs of Abuse Rapid Test

Customization

Customized OEM service for DOA rapid test in multiple formats
(Multi Panel/Cassette/Strip/Cup/Uncut Sheet)

Parameters

20+ parameters for desirable combinations of multi panel test
(Urine/Saliva Sample, Regular/Customized Sensitivity)

One Step Multiple Drug Test Kit (MOR/MET/KET/THC/MDMA)

Lateral Flow Assay UNCUT SHEET

Custom Samples Tailored Solutions

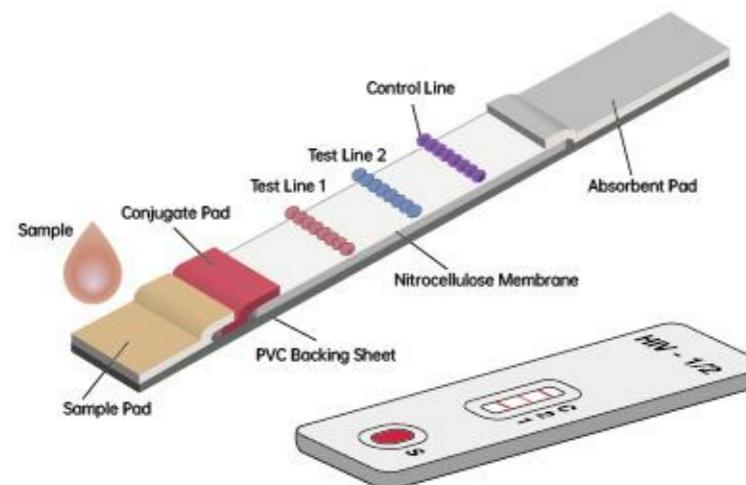

Beyond Typical OEM Cooperation

Start from Uncut Sheet

The uncut sheet is consisted of **key components** as below :

- Sample Pad
- Colloidal Gold Conjugate Pad
- NC Membrane
- Absorbent Pad
- PVC Backing Sheet

Upon your receiving of the pre-assembled uncut sheet, it is strongly recommended a 3rd QC inspection procedure be properly arranged **prior to** further operation or processing.

FAQs

① Basic Info (NewScen · Manufacturer)

>About us :

- MOQ : 200 Uncut Sheets
- Method : Lateral Flow Assay (Immunochromatography Assay)
- Capacity : ≥ 10,000 Uncut Sheets (Regular Daily Output / Production Line)
- Category : 10 Categories (57 Kinds of Uncut Sheets in 10 Categories)

② Trial Order (OEM · Private Labeling)

>About you :

- Standard : QC Inspection Standard (Preferably in a Check Form, or the descriptions in details including requirements for the Performance / Appearance, etc.)
- Design : Design and Dimensions Drawing with precise sheet component position in details
- Format : Cassette / Midstream / Strip (Preferably in Picture with Dimension)

③ Sample (Regular Format · Evaluation)
